

Author Agreement Form for
Publications in JABs//JAPS//BRIJ//e-Books

Dear Authors,

Thank you for choosing to publish your work with us. Please read this document and sign your name at the end [space indicated]. *A signed copy of this Agreement must be submitted together with each manuscript.* **Follow these steps: 1. Print; 2. Sign; 3. Scan; 4. Send by email.**

1. Submission of articles to multiple journals.

It is unethical to submit an article for publication in different journals, either for simultaneous review or otherwise. *Elewa Biosciences* will not consider any manuscripts that are being reviewed by other publishers or have been previously published elsewhere. By signing this paper you the author(s) declare that your paper has not been submitted to another journal at the same or any other time.

2. Withdrawal of manuscripts after they have been reviewed and outcomes communicated.

Elewa Biosciences is making enormous effort to support you to publish your work at minimal cost. Withdrawing a paper after it has been **reviewed and accepted** [but not yet published] is a waste of our time and resources. Please be aware that any accepted paper withdrawn before publication will attract a charge of 100 USD. Until this cost is paid, the withdrawn manuscript will be marked with the words [DRAFT WITHDRAWN] and this will be published on a special link at the journals website (without author names). Such a manuscript will not be accepted by any other journal while this status remains.

3. Payment of publication fees.

The current charge for publishing an article in any of our journals is 190 USD. Publications in e-Books require special arrangements. It is expected that publication fees will be paid immediately after a paper has been published. Where authors refuse or unnecessarily delay to pay the publication fees after a paper is published, the paper will remain published but the names of author(s) and their institutions will be removed.

4. Agreement of all authors.

Where a manuscript has been written by several authors, *Elewa Biosciences* will require all authors to write their names below [on this form] and each author to sign against their name to confirm that: (i) they have read and reviewed the manuscript and, (ii) they agree with its contents and the decision to submit it to our journal for publication. Please note that the full publication fee will be paid if a dispute arises between authors *after review and publication*, and any of the authors requests that the manuscript be withdrawn.

Please complete the following details for each manuscript

S/No.	Author name	Signature	Date
